Prepare yourself for a pleasant surprise

The Deep Muddy spincasting reel is full of features you'd usually pay much more to own:

- A chambered mainframe for maximum rigidity and strength.
- Polished stainless steel front and rear hoods for maximum strength and corrosion resistance.
- A soft-touch hood ring for easier gripping and turning of the hood.
- Powerful cast and machined all-metal drive gears.
- Right/Left convertible handle.
- Oversized aluminum spool.
- An automotive disc brake system for maximum strength, smoothest action and widest adjustment range.
- A dual positive anti-reverse system for consistent, maximum stopping strength.
- The comfort-touch grips keeps your hand in the fight for hour after hour of hard fishing.

So what do these specifications do for you? Truth be told, they do nothing for you until you go fishing.

But when you do go fishing with the DM-40 reel, you'll find that these features give you a chance to fight harder, fight longer and fight with less fatigue. While all reels have a limit of durability, we purposely over-designed the Deep Muddy Reel so that you can test your skills to the limit.

Fish hard. Fish safe. And have fun!

CARE AND MAINTENANCE

While we have done everything possible to make your Deep Muddy Reel the highest value available, it remains a finely tuned piece of equipment that requires a minimal amount of care and maintenance. We congratulate you on your excellent choice of fishing equipment and recommend that you review the following maintenance suggestions; for the longest lasting pleasure with your tackle, we suggest adding these simple procedures to your regular fishing regimen.

BEFORE EACH FISHING TRIP

Carefully consider your choice of equipment. We all know that we cannot reasonably expect a small sports car to carry the local football team to its games; every car is designed for a certain purpose. In the same way, all fishing equipment is designed for a limited set of circumstances. For the greatest fishing performance, your choice of equipment should consider the type of fishing for which it will be used.

- Check that the line on your reel is fresh. Most lines tend to stretch and degrade over time and lose both their pull test and knot strength.
- Check that the reel has been cleaned, greased and stored properly with the drag slightly loosened.
- Check that the rod guides are all in good condition (no broken or loose rings).
- Check that the rod seat holds the reel securely in place

AFTER EACH FISHING TRIP

Clean both your rod and reel, lubricate your reel carefully, and back the drag off slightly before storing your reel. This is probably the most important recommendation for maintaining the longest working life of your reel and rod.

It is not necessary to submerge your reel in fresh water or hit it with a high-pressure blast of water. Few reels are dragged through mud or keel hauled behind a boat; therefore gently spraying your reel and rod with clean water after each fishing excursion and wiping them off thoroughly with a soft towel will take care of most cleaning requirements.

After cleaning, a light coating of a thin, high grade oil on all moving parts is recommended. While we strongly recommend using a competent service technician for maintaining the insides of your reel, we know that many folks who fish enjoy disassembling their reels both for fun and for maintenance purposes. To assist those who do disassemble their reel, the attached exploded drawing should help explain the parts and assembly of your Deep Muddy Reel, and to help if ordering parts is required.

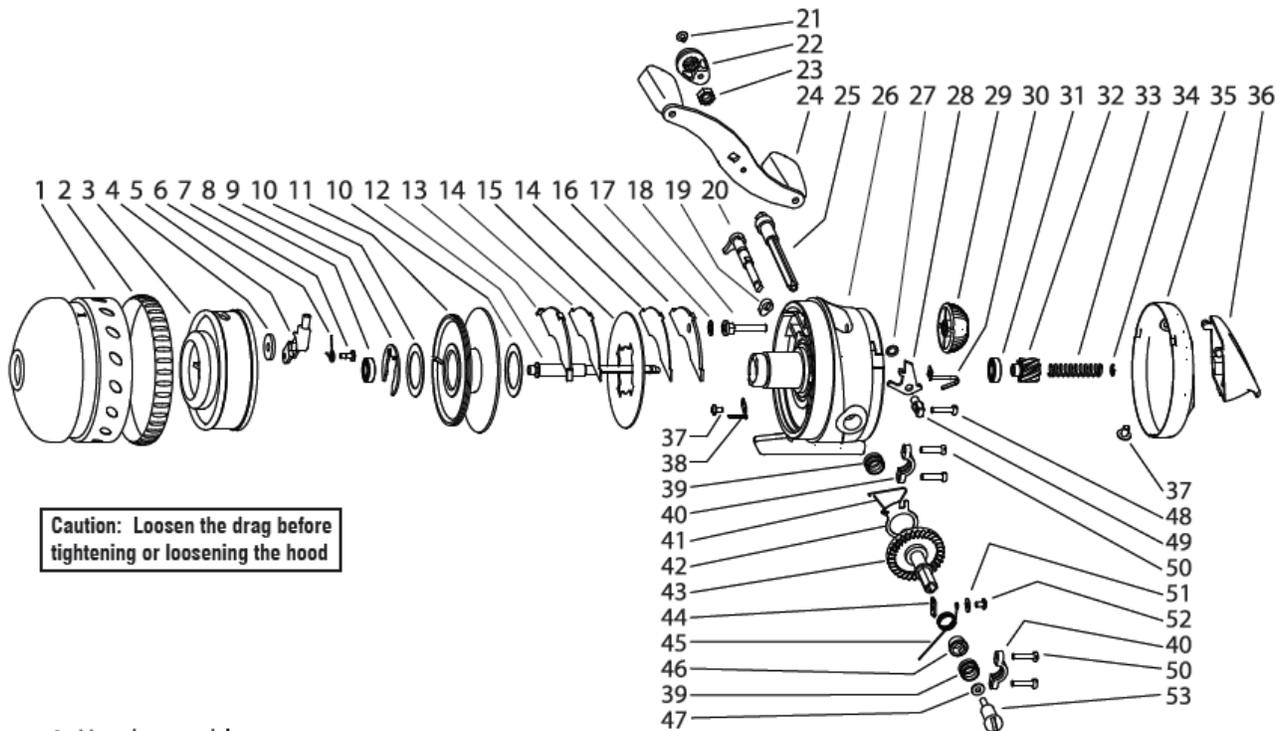

ONCE EACH SEASON

If you properly maintain your reel and rod as recommended above, it is unlikely that you will ever need to send your reel in for service. Nonetheless, we recommend an occasional trip to a service center for a professional cleaning and service of your reel.

Service centers generally use better grades of grease and oil than most folks keep on hand, and it is very helpful to have a trained eye inspect your reel occasionally to make sure no unforeseen problems are developing.

If you follow the above recommendations, you should look forward to many enjoyable fishing experiences. Thank you again for your purchase of this outstanding Deep Muddy Reel.

PARTS SCHEMATIC

1. Hood assembly
2. Hood grip ring
3. Rotor assembly
4. Carrier roller
5. Pin carrier assembly
6. Carrier spring
7. Carrier screw
8. Ball bearing (6.5x13x3.5)
9. Spool clip
10. Spool washer (2)
11. Spool assembly
12. Main shaft
13. Front caliper
14. Friction pad (2)
15. Drag disk
16. Back caliper
17. Drag spring
18. Drag plunger
19. A/R cushion cam
20. A/R switch
21. Handle nut cover screw
22. Handle nut cover
23. Handle nut

24. Handle Assembly
25. Handle shaft
26. Main body
27. Pawl shim
28. A/R pawl
29. Drag dial
30. A/R switch spring
31. Ball bearing (7x14x3.5)
32. Pinion gear
33. Mainshaft spring
34. Spring retainer
35. Back cover
36. Push button
37. Retainer screw
38. Clicker

39. Main gear bushing (2)
40. Bushing retainer (2)
41. A/R friction spring
42. A/R retainer plate
43. Main gear
44. Coil anchor plate
45. Cushion coil
46. Coil bushing
47. Handle screw washer
48. A/R pawl post screw
49. A/R pawl post
50. Bushing retainer screw (4)
51. Coil screw washer
52. Coil screw
53. Handle screw
