101—B	Left End Worm Bearing	.10
101—C	Left End Screw Bearing	.15
103	Spool Latch	.10

SPOOL ADJUSTMENT ON YOUR "2000" REEL

The spool on your OCEAN CITY No. 2000 reel was precisely adjusted for maximum casting efficiency when it left our factory. We suggest you do not alter this setting in any way until, through normal use, your spool develops an excessive amount of end play. When you find it necessary to readjust the spool you can do so very easily with the aid of a small screw driver. Just turn the small screw "A" to the right until you have removed the excessive end play. DO NOT REMOVE ALL THE END PLAY. *For best results always leave a little end play in the spool.*
