

Instructions and Warranty for the Eureka! Singlis ST Sleeping Pad

To Inflate:

1. There are two valves on the pad - one black and one red. Close the black valve.
2. The red valve is part of an internal foam pump. Open the red valve and place the palm of your hand over the mouth of this valve. See Photo.
3. Place your other hand on the first and over the internal foam pump. Press down with both hands to expel the air from the pump into the air tubes. For this to work, the palm of the bottom hand must act as a stopper covering the valve mouth.
4. Lift both hands up from the valve/pad to allow air to automatically refill the foam pump.
5. This process is similar to CPR. Repeat this press and release until the tubes are filled to your liking. Close the valve cover.

Take care: do not overfill the pad. When overfilled the pad develops a "C" shape.

Average inflation time: Regular = 1.5 minutes Large = 2.5 minutes

To Deflate:

1. Open the black valve to let air escape from the tubes
2. Roll the pad towards the valve. Push with your hand to help move air in the tubes towards the valve.
3. With most of the air removed, unroll the pad. From the side, fold it in half along its length, then fold the two halves. Re-roll the folded pad toward the black valve and stow.

To Store:

- Make sure the pad is clean and dry.
- Store the pad flat with both valves open. Under a bed or couch is a good place. The pad will inflate faster and fuller if stored flat and unrolled.

To Clean:

Never place the pad in a washing machine. Fill the pad with air. Wash it with water, a soft bristle brush and a mild household cleaner such liquid dish washing detergent. In a bath tub or outside with a hose works well. Hang pad to dry thoroughly before storage.

To Preserve the Pad:

- Protect the pad from sharp rocks / twigs. Clear the area and layout a ground cloth unless using in a tent.
- Protect it from flame or sparks.
- Protect it from chemicals- sunscreen, insect repellent and chlorine
- Protect it from a pet's claws and teeth.
- Do not leave the inflated pad in a closed vehicle in the hot sun.
- Do not leave the pad in direct sunlight for long periods as UV rays will degrade the fabric.
- Do not leave the pad rolled for season long storage.
- Do not use the pad as a flotation device.

To Repair Pad Leaks:

- Find the leak! Inflate the pad and submerge it under water. Press on the pad and look for a steady stream of bubbles. Mark the leak with chalk or crayon. Do this in folded sections if you can't contain the entire pad in water.
- Thoroughly dry the pad. Paint the leak with a sealer such as Seam Grip® or Aquaseal®. Allow to cure for about 3 hours.
- If you find a slice or tear, you will need to patch and seal it. Use the sealer along with the included fabric patch to effect a repair.
- Once the repair is completed, place some weight on the pad and test it over night.

LIMITED WARRANTY

What is Covered:

Johnson Outdoors Gear LLC warrants to the original purchaser that its products are free from defects in material and workmanship, for the life of the product, except as qualified below. The life of the product is determined from the date of the purchase until such time as the product is no longer serviceable due to normal wear and tear.

What is Not Covered:

Johnson Outdoors Gear LLC shall not be responsible for the natural breakdown of materials that occurs inevitably with extended use (e.g. Ultra Violet (UV) light damage on sleeping pads), or defects caused by accident, abuse, alteration, animal attack, storm damage, misuse or improper care / storage.

THERE ARE NO OTHER EXPRESS WARRANTIES BEYOND THE TERMS OF THIS LIMITED WARRANTY. IN NO EVENT SHALL EUREKA! BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the previous statement may not apply to you.

What We Will Do:

At our option we will either repair or replace without charge any part of the product that is not free of defect in material or workmanship.

How to Obtain Warranty Service:

Contact our Customer Service Department: toll free 1-800-572-8822. Direct shipments without speaking to a customer service representative by law cannot be accepted.

How State Law Relates to This Warranty:

This warranty gives you specific legal rights, and you may have other rights that vary from state to state.
