SPOOL ADJUSTMENT ON YOUR "2000" REEL
The spool on your OCEAN CITY No. 2000 reel was precisely adjusted for maximum casting efficiency when it left our factory. We suggest you do not alter this setting in any way. If you desire a greater amount of end play, when you find it necessary to feed the spool, you can do so very easily with the aid of a small screw driver. Just turn the small screw on the right end of the spool clockwise to the desired amount. Do NOT REMOVE ALL THE END PLAY. For best results always leave a little end play in the spool.
