# With care and periodic cleaning, your reel will serve you with years of excellent performance.

#### Warranty

This reel has a one-year warranty. For complete warranty information, visit our website at www.pfluegerfishing.com

Pure Fishing, Inc • Columbia, SC Pure Fishing, Inc a subsidiary of Jarden Corporation (NYSE: JAH)

PFL-252-PAT-ver1

## Care & Maintenance

- The same method of cleaning is valid for all reels in the
- Monarch series.
- 1. Remove line and backing.
- 2. Remove the spool.
- 3. Flush away dirt by placing the spool and frame under a stream of warm water.
- 4. Dry carefully with a lint free cloth.
- 5. Lubricate with a good quality oil at the points illustrated on the diagrams.
- 6. Always ensure the spindle is adequately greased.
- 7. Always turn the disc-drag to the minimum setting to avoid compression of the system.
- 8. Always ensure the reel and line are dry before storing in the case or pouch.

#### To convert your reel to right hand wind

- 1. Remove the spool out of the frame by rotating spool so that spool release button is visable. Using your index finger, depress button and pull spool off axle.
- 2. Pick up frame so that the axle assembly is visable.
- 3. Using you thumb and index finger, remove complete axle assembly by gripping the knurling at the base and turning counter-clockwise.
- 4. Once axle assembly is removed, the external key washer and clutch assembly will be exposed. Remove both the external key washer and clutch assembly by turning the frame 180 degrees so it is upside down and gently tap the frame on your hand or table.
- 5. Rotate the clutch assembly 180 degrees and replace into frame. Replace external key washer making sure the stainless steel side is facing out.
- 6. Replace the complete axle assembly and tighten. Replace spool assembly - your reel should now be right hand wind.
