MODEL NO.	LINE / CAPACITY	GEAR RATIO	WT. (OZ.)	BEARINGS
CT-200A	8/230, 10/210, 14/120	5.0:1	9.7	2 ball, 1 roller

Durable, simple, precise and nothing else. The Calcutta™ is for aggressive anglers who demand the most out of their tackle.

Durable - Calcutta's one-piece die cast aluminum frame provides strength without excess weight. Pinion gear, clutch cam, and yoke will faithfully handle the pressure of even the most rigorous tournament fishing.

Simple - Pure mechanical simplicity is achieved with the Shimano Variable Break system™. Casting functions are simplified with the flush mounted, QuickFire II® clutch bar. It naturally positions your thumb on the spool at all times.

Precise - A feeling of incomparable smoothness and pure precision is the result of Calcutta's aluminum componentry and three carefully placed bearings (2 ball & 1 roller). Control is maximized and handle play is completely eliminated by the Super Stopper™ anti-reverse. Drag smoothness and reliability is enhanced by the use of molybdenum, which provides a low friction surface allowing the drag to start smoothly, and a titanium/cotton material which widens the drag pressure range.
